ON VOTING

Topics of Local and

General Interest

ACCORDING TO Dr. Gallup's poll, in November only thirty million of the eighty million eligible voters will cast their ballots for men of their choice for public offices. This is rather a deplorable State Historian Tells of situation, considering the fact that this country is engaged in a war that is fighting to preserve and and died for this principle and now have to be sold on the idea that in order to create government of the people and for the people we must make it by the people. We can talk against our Congressmen, our Senators, picking them to small bits conversationally. We can criticize and find fault with acts of Congress and our President. It is the instrument of the people, and the people want to guard this function. Local and state politics enter into the voting picture. Everyone has the power, if they are citizens, to voice their approval or disapproval at the voting booth. There is much fault to be found in the work of political machines, of executive offices and we all know in Michigan that much criticism of policies and laws is deserved. It is impossible for everyone to be wholly pleased with legislation and the exercising of this right of criticism makes us the democratic government. Do not criticise however, without exercising your right to vote and offer your government your protest or affirmation, officially.

Your State Government Is a BIG Job

EVEN IN ORDINARY TIMES the Governorship calls for competent leadership. Now with the Nation at war and with Michigan's important role in the war effort, the responsibilities of the Governorship can only be met by a man who has the vigor to get things done. Governor Van Wagoner's experience as Governor and as State Highway Commissioner for eight years assures you that he will get things done—and RIGHT!

Harry F. Kelly has made his position clear on three more important issues:

ON EFFICIENCY:

"If I am elected Governor, I shall see that no unnecessary manpower is wasted in government while Michigan pleads for manpower in industry and on farms during these critical days."

ON SMALL BUSINESS:

"I shall seek to remove the yoke gradually crushing small business, by eliminating the needless State ernmental interferences now imposed upon it. I shall enlist the good judgment of small business representatives in the administration of State affairs."

ON GOVERNMENT:

"I contend that the Governor owes a very definite duty to every political subdivision of his State: that every one of Michigan's 83 counties deserves from its Governor an awareness of its individual problems and a willingness to help in their successful

Remember TUESDAY, NOV. 3rd

The Eyes of the Nation Wil! Be on Michigan That Day!

That will be the last day until next presidential election to register a protest vote on issues confronting the American people at home. We are a great Republic with a two party system. A system that guarantees our liberty, our freedom of religion and our right to a voice in our government. May we always hold on to it!

We are engaged in a great war and we must put forth our greatest effort to win this war as quickly and as economically as possible. The New Deal still controls the government.

What Have We?

We have loads of red tape - bureau after bureau and multiplying bureaucrats. Millions of dollars are being wasted and more and more fat jobs being handed out to inefficient bureaucrats. The fellows who fought in the last World War know how the boys in the battle lines feel about all this needless waste of money and red tape at home.

This New Deal administration is made up of fellows who don't care how much they spend as long as someone else has to earn it. The administration wanted to increase social security pay-roll deductions. The Republicans in Congress joining with the labor leaders prevented it. If it was to be an extra tax it should have been equally distributed as a tax among the higher income groups in the opinion of the labor leaders and Republican congressmen opposed to the bill. That's something for the wage earner to think about. How about Free Trade after the war? How about monopoly after the war? How about all the little pigs that were killed and buried while Hitler was putting them in tin cans for future use? Wrapped up in many things going on at the present time are sinister influences gotten up by half-baked theorists and bureaucrats that may play havoc with us after the war.

November 3rd is a good time to notify the administration at Washington that you are not satisfied with the way things are going and that you are checking up a little.

A STATEMENT BY THE JONKMAN COMMITTEE

It has been impossible for Congressman Jonkman to make a personal campaign because of his duties at Washington. The campaign has been left in the hands of his friends.

Congressman Jonkman's opponent continually states that Jonkman did not support a war program before December 7th. All patriotic Americans hoped and prayed before December 7th that America could keep out of the war. Mr. Roosevelt was re-elected on the promise that he would keep us out of war — that no American boy would ever be sent to die on foreign soil. December 7th made those prayers and hopes and promises impossible. Since Pearl Harbor, every patriotic American has been 100% behind the war effort, and Mr. Jonkman's opponent has not and cannot point to a single thing which indicates in any way that Jonkman has not been behind that effort. Reasons for his re-election follow point by point.

1st — He is honest and sincere and is putting forth an all-out war effort.

3rd — He is not a "rubber stamp congressman." He has backed the war effort 100%. But on economic matters he reserves the right to fight for what he thinks is right for the people of his district and his country. 4th — He is against New Deal waste — New Deal extravagance and New Deal bureaucratic control. He wants both parties to have their say in this crisis. 5th — He wants a government "of the people, by the people and for the people" to remain ever dear in America

- even in this war so far as possible and most certainly 6th — He believes if a boy is good enough to fight he is good enough to vote. 7th — He believes if 30 million dollar buildings cost 75 million and kicks about it he is not bucking the war effort. 8th — He doesn't believe in being a "yes man" as long as the people delegate him his responsibility. 9th — He believes when we all fully realize what is going on in Washington effecting local conditions they will want men in Congress to stand up and fight for the people back home. 10th — He believes, if ever there was a time in the history of our country that we need a militant minority, it is now

by STOCKING your COAL NOW!

You'll be freeing the lanes of transportation to help "keep 'em rolling"-when you place your entire winter's coal supply order now! The government wants you to. And you'll be avoiding an uncomfortably cold winter-because with railroads and trucks needed for war supplies transportation, there may be no way of getting all the coal you need later!
